DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Feiring et al (6,790,587).

3. Feiring et al disclose fluorinated polymers, photoresists and associated processes for microlithography are described. These polymers and photoresists are comprised of a fluoroalcohol functional group which simultaneously imparts high ultraviolet (UV) transparency and developability in basic media to these materials. The materials of this invention have high UV transparency, particularly at short wavelengths, e.g., 157 nm, which makes them highly useful for lithography at these short wavelengths. The polymers in columns 3-10, and in the examples appear to meet the instant claim limitations.

4. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Dammel et al (6,686,429).

Dammel et al disclose a UV sensitive resist comprising fluorinated alcohol monomers which appear to meet the instant claim limitations in columns 5, 6, and 15, and claim 5.
